Name : MR. SPECIMEN REPORT

Pat. ID : 2202065

Age : 28 Yrs. 3 Mn. 22 Day Gender : M

Ref. By : FAMILY PHYSICIAN

Registered on : 06/02/2022 12:38:06

Received on : 06/02/2022 13:04:00

Reported on : 06/02/2022 13:04:36

Investigation(s): Cholesterol-Total

Test Name	Value	Unit	Normal Value
Cholesterol-Total	156.92	mg/dL	140.00 - 180.00

Interpretation(s)-

-A desirable total cholesterol level for adults without heart disease is less than 180 mg/dL

-Borderline 180 - 200 mg/dL

-At Risk 201 - 239 mg/dL

-At High Risk >240 mg/dL

Note: The normal range of Cholesterol depends on age, sex, race, and geographical location.

Comment(s)-

The total cholesterol measurement is a sum of High Density Lipoprotein (HDL), Low Density Lipoprotein (LDL), and Very Low-Density Lipoprotein (VLDL).

Increasing concentrations of Total cholesterol and LDL cholesterol are both correlated with increasing risk of cardiovascular disease. The levels are used to monitor response to cholesterol lowering therapy.
